# Yudi Maryadi

Full Stack Developer • yudimaryadi039@gmail.com • 082247044713

---

Full Stack Developer with 2.5 years of experience building scalable web applications using both microservice and monolithic architectures. Proficient in React, Node.js, PHP, Vue.js, and other technologies, with strong expertise in handling client requirements from inception to deployment. Skilled in creating robust solutions while collaborating with cross-functional teams to ensure seamless delivery. Additionally, I have **1 year of experience in the logistics/expedition industry**, where I built and maintained a bridge system for sellers to easily track AWB across various expedition services by integrating internal systems with APIs from J&T, JNE, Ninja, and others. I also have **1.5 years of experience in HRMS (Human Resource Management System)**, where I built and managed systems for clients, including **Super Indo, RS Mitra Keluarga, DECA Group, FitHub**, and others.
